RECENT HIGHLIGHTS:

- **As millions in Ukraine brace for the third winter since the full-scale invasion, UNHCR and partners have stepped up efforts to [deliver assistance](#) to help people stay safe and warm.** As part of the inter-agency response, and in support of Government efforts, UNHCR and NGO partners began delivering cash assistance to help vulnerable people cover additional winter needs, providing essential items for winter, and helping people to insulate their homes. [UNHCR aims to support](#) 550,000 displaced and war-affected people in Ukraine with cash for energy and heating needs during the 2024-25 winter season.
- According to [UNHCR protection profiling and monitoring](#), a notable increase in **cross-border movements** from February 2024 onwards was observed, followed by a significant decrease after the summer. In September, outbound movements surpassed inbound, reversing a trend from July - August. As of 23 October, less than 25 per cent of surveyed individuals reported leaving Ukraine for the first time since the beginning of the full-scale invasion in February 2022, a slight increase from the two months prior. While security and energy-related concerns continue to be the most commonly cited reasons for departures, shelter-related issues have emerged as the third, accounting for 22 per cent of departures from August - October.
- **Update on response to evacuations in Ukraine:**
 - According to the **Donetska** region administration, since 1 August over 128,000 people have reportedly left the region, including over 24,000 from areas experiencing active hostilities. Approximately 330,000 residents remained in Ukraine-controlled areas of the region, with an estimated 63,000 residing in zones of active hostilities. UNHCR and NGO partners are supporting transit sites for evacuees through refurbishment, supply of equipment, coordination and management. UNHCR is also providing lifesaving protection and multisectoral assistance to evacuees both inside and outside these centres.

COORDINATION

UKRAINE

In Ukraine, UNHCR leads three Clusters, namely Camp Coordination and Camp Management (CCCM), Protection, and Shelter and Non-Food Items (NFI). The CCCM Cluster was activated in March 2022 and coordinates 18 UN and NGO partners across three hubs, with the aim of supporting 157,000 people in collective sites in 2024. The Protection Cluster consists of 166 partners, including sub-clusters, and operates three coordination hubs to reach an anticipated three million people in 2024. The Shelter and NFI Cluster coordinates 98 active partners across three coordination hubs, targeting 3.9 million people in 2024 with NFI kits, emergency shelter and housing repairs. UNHCR also co-chairs the Protection Strategy Working Group under the Humanitarian Country Team, and the Accountability to Affected Populations (AAP) Working Group. Through its leadership in these areas, UNHCR promotes the centrality of protection, as well as meaningful engagement and participation across the response.

REGIONAL REFUGEE RESPONSE

Through the [2024 Regional Refugee Response Plan \(RRP\)](#), 313 partners in Belarus, Bulgaria, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Republic of Moldova, Romania and Slovakia work towards ensuring refugees have effective access to legal status, protection and rights in their host countries and that refugees with specific needs and vulnerabilities have access to targeted support and assistance. The plan also aims at strengthening refugees' socio-economic inclusion in their host communities and increasing their self-reliance, while at the same time reinforcing social cohesion between refugees and their hosts. In support of the government-led responses across the region, UNHCR leads and coordinates the implementation of the inter-agency RRP in line with the Refugee Coordination Model, collaborating and consulting with authorities, aid agencies, civil society, and with affected populations.
