Rwanda
GBV Situation Analysis Dashboard
January - May 2024

OVERVIEW

The data for this dashboard was collected and reported by UNHCR and its partners (Alight, Plan International and Save the Children) as of May 2024. Survivors are mainly refugees and asylum seekers. According to available data, women and girls are disproportionately affected by GBV incidents. Additionally, the analysis further identified a significant proportion of children (30%) as GBV survivors.

141
GBV incidents

51%
of the alleged perpetrators are Husband, wife and intime partner

% of person affected

88% female | 12% male
